

BPMN 2.0 Method and Style

Levels Based Methodology for BPM Process Modeling and Improvement

Learn from the experts with step-by-step tutorials that teach you how to create precise business processes using the BPMN 2.0 standard.

Delivery: e-Learning

Certificate: Certificate on Completion

Author: Bruce Silver

Mock Exam: N/A

Duration: 7 hours, self-paced

Language: English

Course Overview

This interactive e-learning course, with audio and video narrative training and step-by-step exercises, will teach you everything you need to create precise BPMN process models that can be clearly understood and adopted by the wider business.

You can practice your skills with prescribed "in-class" exercises using the *Orbus Software* BPMN 2.0 Visio template. This course will teach you how to create good BPMN models with clear process logic that can be shared across your organization.

You will learn how to create end-to-end diagrams that are correct according to the rules of the BPMN specification.

Most importantly, the course will teach you how to adhere to a common modeling method and style, allowing you to create diagrams that can be shared consistently across all business domains, including IT.

Who Should Take This Course?

The course is ideal for professionals who work within an organization that uses the BPMN 2.0 specification for business process mapping and modelling. It also provides an excellent introduction to business users

and process implementers alike. BPMN is designed for individuals, teams and different stakeholders that need to communicate processes in a standardized manner.

The Author

The course has been designed and written by the leading BPMN training expert and author, Bruce Silver.
