Earn your DevOps Foundation certification with this fully-accredited course from Good e-Learning! A perfect choice for professionals working within IT operations, development, testing, quality assurance (QA) or management and a fantastic first step for aspiring DevOps engineers.

WHY TAKE THIS COURSE?

DevOps is designed to solve human errors by helping companies reevaluate the relationship between development and operations professionals.

Its proven effectiveness has seen its popularity skyrocket over the last few years, with DevOps certifications becoming highly valuable and sought after achievements for IT managers and professionals worldwide.

ABOUT THIS COURSE

This course offers an excellent introduction to the terminology and methods of DevOps, as well as the benefits it can offer IT-driven businesses.

The content explores how DevOps relates to other practices, such as Lean and Agile, as well as general ITSM. Most importantly, students will learn how to apply DevOps to real world-organizations, regardless of their size, location or industry.

The course consists of 7 modules:

- An Introduction to DevOps Foundation
- Module 1: Exploring DevOps
- Module 2: Core Principles and Practices
- Module 3: Business and Technology Frameworks

- Module 4: Culture, Behavior and Operating Models
- Module 5: Automation and Architecting DevOps Toolchains
- Module 6: Measures, Metrics and Reporting
- Module 7: Sharing, Shadowing and Evolving
- Practice Exam Simulator

ACCREDITATION

This course has been fully accredited by the DevOps Institute.

IS THERE AN EXAM?

There is a closed-book, multiple-choice exam with 40 questions and a duration of 60 minutes. The pass mark is 65%.

In countries where English is a second language, the time allocated for the exam is extended to 75 minutes

The test can be taken online at any time via PEOPLECERT. Candidates will require a webcam and microphone.
