None

LANGUAGE

English

Lean Master Belt Practitioner is an advanced level of the Lean Foundation and Management Overview course and it is suitable for those looking to become a certified Lean Practitioner. It provides all the practical skills and knowledge to start practicing and implementing Lean within an organization.

WHO SHOULD TAKE THIS COURSE

This course is ideal for professionals who have successfully completed the Lean Foundation & Management Overview course and are looking to become Lean practitioners.

The course is also ideal for anyone who wants to enhance their career prospects in Lean Management.

ABOUT THE COURSE

Lean Master Belt Practitioner is the second, advanced course that follows on from the Lean Foundation and Management Overview eLearning.

If you are new to Lean you should complete the Foundation level first as a pre-requisite before moving forward with the Practitioner Course.

On completing this course, students will be able to identify how Lean can be related to an Organization and have the knowledge to implement a successful Lean management project that will benefit and add value to a chosen industry.

WHAT IS LEAN

Lean's primary purpose is to reduce operational costs by eliminating waste and increasing customer satisfaction.

Lean methodology focuses on continuous

business improvement within an organization by encouraging Lean practitioners to motivate their workforce in order to achieve Lean goals.

BENEFITS OF LEAN TRAINING

After taking this course you will have developed the skills to solve problems using the Lean Six Sigma project structure. Lean can be applied to any organization and business process, so you will benefit from being able to apply Lean in your organization's industry sector.

ASSESSMENT AND CERTIFICATION

Our Lean Master Belt Practitioner course is assessed by several short end-of-module quizzes, interactive exercises and the submission of a work project (based around your own Organization) to your Lean Tutor.

If successful, you will be awarded a Lean Master Belt Practitioner Certificate.

Throughout the course, a Lean Tutor will be on hand to answer any questions that you may have and provide you with guidance as you work your way through the course.
