This course provides an excellent introduction to AgileBA, including the philosophy and benefits of utilizing business analysis in an Agile environment.

By the end of the course, students will be ready to sit and pass the Agile Business Analysis (AgileBA) Foundation certification exam.

WHO IS THE COURSE AIMED AT?

- Practicing business analysts who desire a stronger understanding of Agile
- Agile team members looking to become Agile business analysts
- Managers and product owners hoping to adopt AgileBA's best practices
- Anyone seeking to earn the Agile Business Analyst (AgileBA®) Foundation & Practitioner certifications

WHAT WILL YOU LEARN?

- The underpinning principles, processes, and philosophy of AgileBA, and how they are applied in real-world projects
- How to describe and manage Agile's approach to requirements management
- Agile techniques such as timeboxing, MoSCoW Prioritisation, and iterative targeting
- How to produce products for BA within an Agile project, as well as how to evaluate their usage
- The roles and requirements within Agile projects, along with the different 'levels of empowerment' used to describe requirements in relation to a business case

- How to manage and prioritize requirements in an Agile context
- How to test, emulate, and evaluate benefits delivery in real-world Agile projects
- How to drive support and facilitation in Agile environments
- Everything needed to successfully pass the official Agile Business Analyst (AgileBA®) Foundation exam
