English

Around the world, organizations must keep tight control over budgets, deadlines, and resources for the sake of meeting essential business objectives. This course from Orbus Software provides an excellent foundation in SPM, along with a set of tools for successfully realizing the benefits.

WHO SHOULD TAKE THIS COURSE?

- Employees and managers who require an introduction to Strategic Portfolio Management (SPM)
- Students wishing to understand how to tackle common issues in SPM and Application Portfolio Management (APM)
- Users of Microsoft Power BI and iServer
- Organizations hoping to take advantage of demonstrably effective SPM practices

WHAT WILL YOU LEARN?

- The basics of the Orbus Software Strategic Portfolio Management (SPM) solution
- How SPM can be applied in order to solve common APM issues
- How Orbus Software's APM approach fits within Microsoft Power BI and iServer
- Common elements of APM, including establishing application support for strategy, managing the application lifecycle, managing application costs, application rationalization, and data protection

WHY SHOULD YOU TAKE THIS COURSE?

- Orbus Software is a world-class training provider with an expansive portfolio
- Using Orbus Software's SPM Solution can help expedite time-to-value

- Every module offers a simulated practice exercise to provide students with practical experience by using SPM to navigate and analyze a sample dataset
- The course provides several scenarios to help students understand relevant business questions and stakeholder types, how to use a conceptual method of approach, how to utilize data structures, and how to present samples for analysis
- After this course, students will require little additional training in order to begin using SPM practices
- SPM can help enterprise architecture teams to address and present answers on critical business requirements for IT

APPROVED BY
